

digiscribble

The Mobile Digital Notetaker

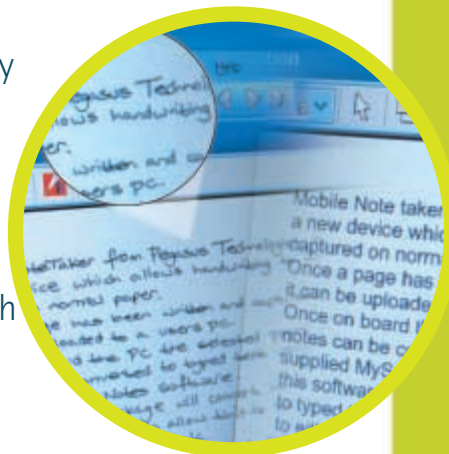

Remotely Capture, Save and Convert handwritten notes with **digiscribble**, the mobile digital notetaker

Fast, convenient, comfortable – just think of the possibilities!

Handwritten notes, maps, sketches, signatures and illustrations can all be captured remotely using a normal ink filled pen!

Save them to your PC and then convert them to typed text and copy or import into MS Office™ applications like Word® and Outlook®. When connected digiscribble also has mouse functionality and you can use it with the 'digital inking' and 'tablet PC' features included with MS Vista™.

Key Benefits

- Stores 50 full pages of A4 text
- Save notes in the Note Manager software supplied
- Backup your notes to CD or DVD
- Recycle your used paper
- Converts in 15 languages
- Use Pen as a mouse
- Windows XP™ and Vista™ compatible
- No hidden extras!!!

digiscribble how it works

digiscribble works in 2 modes -

What's included-

1 x Apcom Digiscribble PC Pen,
1 x Memory Receiver Unit,
1 x USB cable,
1 x Ink Refill,
1 x Stylus
2 x SR 41 Batteries,
Quick Start Guide,
Note Manager Mini CD,
MyScript Mini CD,
Two Year RTM Warranty.

Pen mode

As well as capturing your notes remotely away from your PC or notebook when connected digiscribble captures natural handwriting onto a PC or notebook in real time. Once you have captured & saved your notes in the note manager software included you can back up your notes and recycle your paper. Your notes can then be edited and converted to editable typed text with the MyScript recognition software included. They can then be exported straight into MS Word® or Outlook® or copied to any application. The MyScript software can even learn your handwriting and allows create your own handwriting profile & dictionary.

Mouse Mode

Mouse Mode turns the digiscribble into a mouse with hovering and 2 button functionality. In Mouse mode you can write directly into Windows Journal, and other Tablet PC applications such as MS OneNote™, MSN Messenger™, MS Outlook™ and snipping tool. When connected mouse mode speeds up the whole process of capturing your notes by switching effortlessly between pen & mouse mode. If you have MS Vista™ you have the extra feature of the 'digital ink handwriting software' feature included in MS Office™ where you can handwrite directly onto office applications like MS Word® & Windows Journal®.
